1. The following is an examiner's statement of reasons for allowance: The closest prior art is Zeller et al (US 6,469,005). The reference teaches structurally similar compounds, composition and method use and method of preparation. See column 1-5. However, the claimed structure differs from the reference in that the claimed structure has 1,2-cyclohexylidene or 1,2-cyclopropylidene in between the amino group and phenylene group as against no such group in the reference. There is no motivation to arrive at the claimed compounds using the prior art of record. Inasmuch as the compounds are novel, method of making and method of preparing is novel too. In re Ochiai 37 USPQ2d 1127. Chiellini et al(Bioorganic & Medicinal Chemistry, 2002), is further cited to show the state of the art).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
